Abstracts

The grass trimmer equipment can be classified into three segments: gas-based, electric, and cordless (battery-operated). The gas-based trimmers are the most widely used grass trimmers in the world. Their adoption rate is high in commercial areas such as landscape areas, golf courses, and government establishments. The grass trimmers used in professional landscaping are equipped with more steel in their design to get heavy work done, making them costlier than electric grass trimmers. Electric grass trimmers are widely used in residential areas due to their light weight, better maintenance, less noise, and easy affordability. Cordless (battery-powered) grass trimmers eliminate the drawback of limited movement of the gas-based and electric trimmers.

Scope of the Report:

This report focuses on the Grass Trimmer in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa.
