The global Gravity Filling Nozzle market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Gravity filling nozzle is a nozzle used to fill liquid into a tank or container by gravity. The nozzle is usually connected to a hose or pipe that is connected to a liquid source, such as a tank or a tank. They are designed to provide a controlled flow of liquid into the container, which helps prevent spillage, spillage and other types of waste. The gravity filling nozzle can be equipped with various features to improve its performance and ease of use, such as automatic closing valve, flow control valve and level sensor. Depending on the specific application requirements, they can also be made of a series of materials, such as stainless steel, brass or plastic.
