According to our (Global Info Research) latest study, the global Gravity Flow Racking Systems market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

There are three types of gravity flow racks: carton flow, pallet flow, and push back.

In gravity flow rack products are placed in the loading side of the system. When the front item is picked, the following item glides forward so that the next product is in the front position.

This movement of the inventory to the front position is accomplished by gravity. This makes it a cost-effective option for automatic replenishment of the front picking position.

Gravity flow systems include options for first-in, first-out (FIFO) and last-in, first-out (LIFO) inventory management. The goal of both FIFO and LIFO is to ensure the efficient flow of products while maximizing space.
