Gravity Free Fall Metal Detector is a highly efficient non-contact detection device that uses the principle of gravity to detect metal foreign bodies in materials passing through the device. The device is usually installed in the material conveying system of the production line. It uses electromagnetic induction technology to accurately identify ferromagnetic and non-ferromagnetic metal impurities in the material and automatically separate unqualified materials to ensure product purity and quality. Gravity Free Fall Metal Detector is suitable for the detection of bulk or granular materials, such as food, chemical raw materials, plastic granules and pharmaceuticals.
