Abstracts

The global Grease Control Valves market size is expected to reach \$ 408 million by 2032, rising at a market growth of 5.2% CAGR during the forecast period (2026-2032).

In 2025, global grease control valve production reached approximately 632 k units, the average price is 440 usd/unit. A grease control valve is a fluid control element installed on the grease supply line in a centralized lubrication system. It is used to precisely distribute, open, close, or regulate the delivery of grease (or thin oil) according to a set pressure, time, or sequence, and to direct the high-pressure grease flow output from the lubrication pump to each lubrication point as required.

Market Concentration and Major Players:

Internationally, the grease control valve market is highly concentrated, primarily in developed countries like Europe and America. Large manufacturers include GROZ Engineering Tools and Alentec Orion. Domestically, the grease control valve market still has significant room for growth.

Manufacturing Process and Market Trends:

Grease control valves utilize carbon steel or stainless steel bars, precision-machined into valve bodies and flow channels using CNC milling. These are then assembled with precision-ground plungers or valve core components. Key sealing parts are press-fitted with oil-resistant rubber or PTFE sealing rings. After cleaning and deburring, pressure sealing tests and surface anti-corrosion treatment complete the finished product.

With the increasing demand for centralized automatic lubrication in engineering

machinery, wind power, and intelligent manufacturing, the market is evolving towards high-pressure, anti-clogging, high and low temperature resistant sealing, electric or electromagnetic drive with integrated pressure and flow sensing feedback, and intelligent distribution systems linked to PLCs or IoT systems. This is gradually driving the replacement of traditional valves with high-end distributors.

This report studies the global Grease Control Valves production, demand, key manufacturers, and key regions.
