The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

The use of natural flavors in processed foods and the increasing QSR have led to a surge in demand for oleoresins. Increasing awareness of the side effects of botanicals and herbal extracts on synthetic flavors and their health benefits has greatly boosted the market growth. In addition, due to more and more R & D activities in the market and the increasing popularity of health supplements, the demand for oleoresin in the nutrition and health products industry remains high. The food and beverage market is expected to dominate the oleoresin market during the forecast period. This is due to the increased use of oleoresins, which provide natural flavors and aromas in confections and beverages. In addition, increasing consumer awareness of the benefits of consuming products that are rich in natural ingredients, such as oleoresins, is also driving market growth.
