Abstracts

Chelants, also known as chelating agents, complexing, or sequestering agents, are compounds that are able to form stable complexes with metal ions.

Chelants achieve this by coordinating with metal ions at a minimum of two sites, thus solubilizing and inactivating the metal ions that would otherwise produce adverse effects in the system on which they are used.

Scope of the Report:

This report focuses on the Green Chelates/Natural Chelating Agents in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The technical barriers of green chelates/natural chelating agents are relatively high. In the United States market, there are some local manufacturers, such as BASF, Akzo Nobel and PMP Fermentation Products. Lanxess, Innospec, Jungbunzlauer and some Chinese manufacturers export green chelates/natural chelating agents to United States. Green chelates/natural chelating agents are likely to show a significant grow in the coming years, owing to potential health and environmental hazards associated with non-biodegradable organic chelating compounds.

Green chelates/natural chelating agents have a wide range of application. The Detergent industry presents immense growth opportunities for the chelating agents

market. Personal Care application and Pulp & Paper application also offer huge potential. The demand for green chelates/natural chelating agents is expected to continue increasing during the remaining years of the forecast period of 2018-2023.

In the past few years, the price of green chelates/natural chelating agents has decreased and we expect the price will slightly lower. However, the improvement of energy, transportation costs, employee wages, and equipment depreciation will play a significant role in promoting the cost of green chelates/natural chelating agents.

As the same time, companies are focusing on technological innovation, equipment upgrades, and process improvements, to reduce costs and improve quality. With the snatch for market share in emerging regions, the competition in green chelates/natural chelating agents industry will become more intense.

The worldwide market for Green Chelates/Natural Chelating Agents is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
