Abstracts

The global Green Tire market size is expected to reach \$ 272630 million by 2032, rising at a market growth of 10.4% CAGR during the forecast period (2026-2032).

This report studies the Green Tire market; green tire means the tires used a whole new breed of environmentally friendly rubber. Green tire technology focuses on the fuel efficiency bit. These eco-friendly tires also employ a special type of tightly bonded rubber in the tread blocks to retain more energy while driving – this means a lower rolling resistance and therefore less engine power sapped in rotating the tire. Rolling resistance of a tire can account for as much as 30% of a vehicle's fuel consumption and a quarter of its CO2 emissions.

Global Green Tire key players include Michelin, Bridgestone, Continental, Pirelli, Goodyear, etc. Global top five manufacturers hold a share about 50%. Europe is the largest market, with a share about 40%, followed by China, with a share about 25 percent. In terms of product, Semi-Steel Tire is the largest segment, with a share about 80%. And in terms of application, the largest application is Passenger Vehicle, followed by Light Commercial Vehicle, Heavy Commercial Vehicle.

This report studies the global Green Tire production, demand, key manufacturers, and key regions.
