According to our (Global Info Research) latest study, the global Grid Anti-static Tape market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Grid anti-static tape is a type of adhesive tape that is designed to dissipate static electricity during electronic assembly processes, particularly in environments where static electricity can damage sensitive electronic components. The grid pattern on the tape allows for a controlled discharge of static electricity, helping to prevent ESD (electrostatic discharge) damage to electronic devices. This type of tape is commonly used in manufacturing and repair of electronics to protect the components from static electricity.
