## Abstracts

The global Grid Anti-static Tape market size is expected to reach \$ million by 2030, rising at a market growth of % CAGR during the forecast period (2024-2030).

Grid anti-static tape is a type of adhesive tape that is designed to dissipate static electricity during electronic assembly processes, particularly in environments where static electricity can damage sensitive electronic components. The grid pattern on the tape allows for a controlled discharge of static electricity, helping to prevent ESD (electrostatic discharge) damage to electronic devices. This type of tape is commonly used in manufacturing and repair of electronics to protect the components from static electricity.
