Abstracts

Grocery transportation is the movement of various F&B commodities, raw materials, and other household supplies from one place to another. It helps the grocery industry maintain a continuous supply of durable and non-durable goods from different suppliers and distributors across various locations. Sometimes, companies may also outsource transportation if it is cost-effective. Grocery companies use four modes to transport groceries, namely, roadways, railways, sea routes, and airways. Technological advances have resulted in innovations such as ICT, computerized vehicle routing, active traffic management, online freight exchange, GPS monitoring, and satellite trailing.
