The global Grooved Flange Adapter market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Grooved flange adapter is a type of fitting used in piping systems to connect two pipes of different materials or sizes together. It is designed to connect a grooved-end pipe or fitting to a flanged-end pipe or fitting. The grooved flange adapter has a grooved end that fits into a coupling and a flange end that bolts onto a flange connection. This type of adapter is commonly used in fire protection systems, HVAC systems, and water treatment plants, among other applications. It offers a secure and leak-proof connection between the two pipes and can be easily installed or removed without the need for welding or threading.
