The global Ground Anti-slip Agent market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Ground anti-slip agent products through chemical interaction with ground stone, with super penetration, can effectively penetrate into the floor tiles and stone channels, widen the channel, so that the upper layer forms micropores and forms fine diamond patterns on the surface, and can form a physical suction cup in contact with water or the soles of the feet. Solve the problem of wet and slippery floor tiles in case of water, and they will not slip when it rains or snows.
