Abstracts

Calcium carbonate is one of the most abundantly occurring minerals on earth and composes nearly four percent of earth's crust. It exists naturally in the form of limestone, marbles and chalk formed by sedimentation over a period of time. It is one of the most versatile compounds and finds a variety of applications across a diverse set of industries including construction, steel, and agrochemicals among others.

Scope of the Report:

This report focuses on the Ground Calcium Carbonate in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes The market based on manufacturers, regions, type and application. The increasing demand from packaging and tissue paper application is identified as one of the primary growth factors for this market. The demand for ground calcium carbonate in packaging and tissue paper application is rapidly gaining prominence. Ground calcium carbonate is used in this segment as it creates a porous base on the sheet of paper, due to its rhombohedral particle shape. Moreover, the ground calcium carbonate is hydrophobic and it releases water rapidly. Also, the tissue paper market is constantly growing with the rise in number of quick service restaurant (QSR), food and beverages (F&B) chains, and other associated outlets. These facilities prefer disposable napkins and paper towels since they do not require washing and eliminate the need for labor and are more hygienic when compared to their conventional cloth counterparts. This will in turn, propel the demand for ground calcium carbonate in the coming years. APAC is expected to be the major revenue contributor to the ground calcium carbonate market throughout the forecast period. The region is witnessing an increased demand for ground calcium carbonate from the fillers market due to innovations in terms of

product and quality development. The market in this region is also driven by the growth of the paints and coatings, industrial, and packaging industries.

The worldwide market for Ground Calcium Carbonate is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
