Abstracts

According to our (Global Info Research) latest study, the global Group Meal Delivery Services market size was valued at US\$ 95500 million in 2025 and is forecast to a readjusted size of US\$ 150043 million by 2032 with a CAGR of 6.6% during review period.

Group meal delivery service refers to a form of collective catering service for groups, in which the food is prepared and packaged at a designated location, and then delivered to the group members or designated catering locations through a delivery service. Group meal delivery services refer to services provided by vendors to collective dining settings—such as enterprises, institutions, schools, hospitals, factories, and industrial parks—involving the centralized procurement, preparation, portioning, and timely delivery of meals. These services prioritize food safety, large-scale supply capabilities, nutritional balance, and punctual delivery.

The upstream segment of the industry encompasses grain and cooking oils, meat, poultry and eggs, seafood, vegetables, condiments, pre-prepared dishes, packaging materials, cold-chain equipment, and food testing services. The downstream segment caters to the dining needs of corporate employees, school students and faculty, hospital patients and staff, factory and industrial park personnel, government agencies, and participants in large-scale events.

In the future, group meal delivery services are expected to evolve toward greater standardization, digitalization, health-consciousness, and operational consolidation. Driven by corporate demands for cost reduction and efficiency gains, heightened food safety requirements in schools and hospitals, and the growing need for centralized meal

services within urban office parks and large manufacturing facilities, service providers will increasingly prioritize the development of central kitchens, cold-chain logistics, nutritionally balanced menu design, food safety traceability systems, and smart meal-ordering platforms. Furthermore, industry competition will shift away from mere price wars to focus instead on capabilities in supply chain management, on-time fulfillment, menu consistency, regulatory compliance, and the provision of customized services.

This report is a detailed and comprehensive analysis for global Group Meal Delivery Services market. Both quantitative and qualitative analyses are presented by company, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

Key Features:

Global Group Meal Delivery Services market size and forecasts, in consumption value (\$ Million), 2021-2032

Global Group Meal Delivery Services market size and forecasts by region and country, in consumption value (\$ Million), 2021-2032

Global Group Meal Delivery Services market size and forecasts, by Type and by Application, in consumption value (\$ Million), 2021-2032

Global Group Meal Delivery Services market shares of main players, in revenue (\$ Million), 2021-2026

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for Group Meal Delivery Services

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global Group Meal Delivery Services market based on the following parameters - company overview, revenue, gross margin, product portfolio, geographical presence, and key developments.
