Abstracts

According to our (Global Info Research) latest study, the global Gun Drilling Machine Tools market size was valued at US\$ 10530 million in 2024 and is forecast to a readjusted size of USD 15970 million by 2031 with a CAGR of 5.2% during review period.

Gun drilling machine tools are suitable for deep hole drilling operations with a large aspect ratio, such as cylinders, shaft parts and molds. Gun drilling machine tools use a single-tube internal coolant system, which directly delivers coolant through the center of the drill bit to ensure effective cooling and lubrication of the cutting area, while helping to remove chips smoothly. The built-in coolant channel can accurately deliver coolant to the cutting edge, remove heat and chips, keep the cutting edge sharp, and significantly improve drilling efficiency and tool life. The efficient chip removal design reduces the risk of blockage and ensures stable processing.
