Gynecological Chinese Medicine Injections are injectable formulations derived from traditional Chinese herbs with functions such as promoting blood circulation, clearing heat, resolving stasis, and regulating menstruation. They are designed for the treatment of common gynecological conditions such as menstrual disorders, pelvic inflammatory disease, and endometriosis. These injections are often used as adjunct therapies during acute episodes or in cases with persistent symptoms, offering relatively rapid onset and targeted effects. However, due to their application in a sensitive patient group and the complexity of their mechanisms, further clinical validation and safety assessment are necessary to ensure proper use and risk management.
