The global H1 Food Grade Lubricant Grease market size is expected to reach \$ million by 2030, rising at a market growth of % CAGR during the forecast period (2024-2030).

Food grade grease is a lubricant specially formulated to meet the unique requirements of food processing facilities. It is designed to minimize the risk of contamination during accidental contact with food. This ensures consumer safety and compliance with regulatory standards set by the FDA. The National Sanitation Foundation (NSF) uses these standards to evaluate and classify lubricants for food contact. Food-grade greases suitable for incidental food contact have an NSF H1 designation. NSF H1 food grade grease can only contain certain base oils, additives and thickeners. These ingredients are specified by regulations in FDA 21 CFR 178.3750.
