The key manufacturers of Hadoop-as-a-Service (HaaS) in the world include Cloudera, Amazon Web Services, Microsoft, IBM, Oracle, Google, HPE, SAP, Alibaba Cloud and HUAWEI, among which the top five manufacturers account for more than 50% of the market share, and the largest manufacturer is Cloudera. The global production of Hadoop-as-a-Service (HaaS) is mainly distributed in North America, Europe, China and Japan, among which the first two major production regions account for more than 60% of the market share. At present, North America is the largest production region, accounting for more than 30% of the market share. In terms of products, the market share of Run It Yourself (RIY) has exceeded 60%, and the growth rate of Pure Play (PP) is relatively faster. As far as application is concerned, retail is the first application field, accounting for more than 20% of the market share, followed by manufacturing.

Hadoop as a service (HaaS), also known as Hadoop in the cloud, is a big data analytics framework that stores and analyzes data in the cloud using Hadoop. Users do not have to invest in or install additional infrastructure on premises when using the technology, as HaaS is provided and managed by a third-party vendor.

Hadoop is a software framework used to manage data and storage for big data applications in clustered systems. Hadoop gives users the ability to collect, process and analyze data. HaaS strives to provide the same experience to users in the cloud. HaaS is useful for medium and large scale organizations that do not have the infrastructure or ability to host Hadoop on premises.
