## Abstracts

Hadoop, the Apache Hadoop developed by Apache Software Foundation, is an open-source software framework for storing data and running applications on clusters of commodity hardware. It provides massive storage for any kind of data, enormous processing power and the ability to handle virtually limitless concurrent tasks or jobs.

The base Apache Hadoop framework is composed of the following modules:

- ² Hadoop Common – contains libraries and utilities needed by other Hadoop modules

- ² Hadoop Distributed File System (HDFS) – a distributed file-system that stores data on commodity machines, providing very high aggregate bandwidth across the cluster;

- ² Hadoop YARN – a platform responsible for managing computing resources in clusters and using them for scheduling users' applications; and

- ² Hadoop MapReduce – an implementation of the MapReduce programming model for large-scale data processing.

## SCOPE OF THE REPORT:

This report studies the Hadoop market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Hadoop market by product type and applications/end industries.

The leading growing market is Asia Pacific, such as China, India, Japan, Korea, SEA, etc. USA and Europe are the mature market with relatively lower growth rate.

North America is the largest Hadoop market in the world these years, and USA is the largest country of Hadoop market in the world in the past few years and it will keep increasing in the next few years.
