## **Abstracts**

This report focus on Hair Removal Devices which is used in non-surgical and non-invasive procedures.

### **Scope of the Report:**

This report focuses on the Hair Removal Devices in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Businesses catering the equipment requirement of the commercial beauty clinics and dermatology clinics for hair removal devices and treatments have gained significant popularity in the recent past, owing to increasing beauty consciousness among consumers globally.

Alternative methods that include waxing, manual trimming, and using razors are relatively painful and lead to skin abrasions or irritation. Moreover, outcome of these methods are for a shorter period of time and require repetition after few days or weeks. However, utilization of these hair removal devices helps individuals' treated area, hair-free for months or years, reducing the requirement for repetitive treatments after the complete procedure. This is among the major benefits that has in turn, led to growth of the market over the forecast period.

The worldwide market for Hair Removal Devices is expected to grow at a CAGR of roughly 9.0% over the next five years, will reach 1490 million US\$ in 2023, from 890 million US\$ in 2017, according to a new GIR (Global Info Research) study.
