Abstracts

The global Halal Cosmetics and Personal Care Products market size is expected to reach \$ 39333 million by 2032, rising at a market growth of 6.1% CAGR during the forecast period (2026-2032).

In 2025, the global production of halal cosmetics and personal care products reached 487 million units, with an average selling price of US\$50 per unit. The global annual production capacity of halal cosmetics and personal care products is approximately 750 million units, with a gross profit margin of approximately 57.2%. Halal cosmetics and personal care products refer to beauty and daily care products that comply with Sharia law requirements regarding ingredient sourcing, production processes, and labeling information. They avoid containing hog-derived ingredients, alcohol, and other Haram (prohibited) substances, and ensure that their formulation, processing, packaging, and cross-contamination are Halal certified or traceable to a Halal-compliant supply chain. These products emphasize transparent ingredients, ethical sourcing, and considerations for animal welfare and the environment, aiming to allow Muslim consumers to achieve harmony between faith and life in their daily care. The upstream of the halal cosmetics and personal care product supply chain includes natural oils, minerals, plant extracts, and pigments; the midstream consists of halal cosmetics and personal care product manufacturers; and the downstream mainly includes industries such as hair care products, skin care products, and makeup products.

The halal cosmetics and personal care products market is experiencing rapid growth, with expanding global demand, particularly in the Middle East, South Asia, Southeast Asia, and densely populated Muslim-majority regions of Europe and the Americas. Driving forces include a preference for clean, transparent ingredients and ethical sourcing, as well as a growing number of brands and retailers offering Halal certification, traceable supply chains, and animal welfare-friendly options. While the market is becoming more standardized and globalized as digital marketing, e-

commerce, and regional regulations mature, challenges remain, including certification costs, differences in cross-border regulations, and a unified interpretation of the term 'Halal.'

This report studies the global Halal Cosmetics and Personal Care Products production, demand, key manufacturers, and key regions.
