Abstracts

HALE refer to High-Altitude Long Endurance. High-Altitude Long Endurance Unmanned aerial system (UAV) flight training and simulation can be defined as a simulation of the operation of a real-world system or process related with UAV flight training. These systems simplify pilots to train in an artificial environment that prepare them to obtain skillsets required to gain hands-on experience for real-time situations without the risks associated with actual flights.

Scope of the Report:

Rise in need for virtual simulation solutions, growth in need for commercial drone market, and increased application areas for drones drive the global UAV flight training and simulation market. However, increased adoption of automated UAVs, lack of awareness among end-users, and limited forward field-of-view impedes the market growth. Supportive regulatory framework offers a major opportunity for market expansion.

The global HALE UAV Flight Training and Simulation market is valued at xx million USD in 2017 and is expected to reach xx million USD by the end of 2023, growing at a CAGR of xx% between 2017 and 2023.

The Asia-Pacific will occupy for more market share in following years, especially in China, also fast growing India and Southeast Asia regions.

North America, especially The United States, will still play an important role which cannot be ignored. Any changes from United States might affect the development trend

of HALE UAV Flight Training and Simulation.

Europe also play important roles in global market, with market size of xx million USD in 2017 and will be xx million USD in 2023, with a CAGR of xx%.
