## Abstracts

The global Half Pallet market size is expected to reach \$ million by 2030, rising at a market growth of % CAGR during the forecast period (2024-2030).

A Half Pallet, also known as a Half-Dimensional Pallet or Display Pallet, is a pallet that is half the size of a standard pallet. Generally, a standard pallet is 48 inches by 40 inches, while a half pallet is either 48 inches by 20 inches or 40 inches by 24 inches in dimension. It is used to transport and store smaller quantities of goods or as a display unit in retail environments. Half pallets are designed to be more compact and lightweight, making them easier to handle and maneuver than full-size pallets. They are commonly used for limited storage spaces, in-store merchandising, or for promotional displays.

This report studies the global Half Pallet production, demand, key manufacturers, and key regions.
