Abstracts

The global Halohydrin Dehalogenases market size is expected to reach $ 58.12 million by 2032, rising at a market growth of 7.4% CAGR during the forecast period (2026-2032).

In 2025, global sales volume of Halohydrin Dehalogenase is estimated at approximately 7.5 tons, with an average global market price of around USD 4,556/kg. The gross margin of major manufacturers in the industry is generally estimated at about 35%?60%.

Halohydrin Dehalogenase, abbreviated as HHDH or Hhe, is a biocatalytic enzyme used for the conversion of halohydrin and epoxide compounds. It mainly catalyzes the intramolecular dehalogenation and cyclization of halohydrin to generate epoxide and halide ion. In the presence of nucleophiles such as cyanide, azide, thiol, and nitrite, it can also catalyze the regioselective ring-opening of epoxide to produce a variety of chiral ?-substituted alcohol intermediates. This enzyme is not a conventional hydrolase, but a typical project-based biocatalytic enzyme for chiral synthesis. Its core value lies in mild reaction conditions, high selectivity, and the ability to reduce the use of metal catalyst and complex resolution steps. It is commonly used in the green synthesis of chiral epoxide, chiral alcohol compound, and nitrogen- or sulfur-containing intermediate.

Its downstream applications are mainly concentrated in pharmaceutical manufacturing, agrochemical manufacturing, specialty chemical, and biocatalysis R&D. Among these, pharmaceutical and agrochemical intermediate synthesis places higher requirements on stereoselectivity, substrate adaptability, and batch-to-batch consistency, while specialty chemical and R&D applications focus more on enzyme library screening, process route optimization, and small-scale process scale-up capability. Overall, Halohydrin

Dehalogenase has a relatively small market size but high technical barriers. It is mainly positioned in the field of green manufacturing of high-value-added chiral intermediate and is a typical project-based biocatalytic enzyme product.

This report studies the global Halohydrin Dehalogenases production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Halohydrin Dehalogenases and provides market size (US$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Halohydrin Dehalogenases that contribute to its increasing demand across many markets.

Highlights and key features of the study
Global Halohydrin Dehalogenases total production and demand, 2021-2032, (Tons)
Global Halohydrin Dehalogenases total production value, 2021-2032, (USD Million)
Global Halohydrin Dehalogenases production by region & country, production, value, CAGR, 2021-2032, (USD Million) & (Tons), (based on production site)
Global Halohydrin Dehalogenases consumption by region & country, CAGR, 2021-2032 & (Tons)
U.S. VS China: Halohydrin Dehalogenases domestic production, consumption, key domestic manufacturers and share
Global Halohydrin Dehalogenases production by manufacturer, production, price, value and market share 2021-2026, (USD Million) & (Tons)
Global Halohydrin Dehalogenases production by Type, production, value, CAGR, 2021-2032, (USD Million) & (Tons)
Global Halohydrin Dehalogenases production by Application, production, value, CAGR, 2021-2032, (USD Million) & (Tons)

This report profiles key players in the global Halohydrin Dehalogenases market based on the following parameters - company overview, production, value, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Codexis, Almac Sciences, Prozomix, Enzymicals AG, SyncoZymes, Angel Enzyme Preparation, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices

used in analyzing the World Halohydrin Dehalogenases market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US$ Millions), volume (production, consumption) & (Tons) and average price (US$/kg) by manufacturer, by Type, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.
