Abstracts

Hammocks are pieces of fabric, rope, or net that are suspended between two anchor points. This is usually accomplished by the use of a metal ring or a carabiner that is attached to a tree or a post using a sling or a nail.

Scope of the Report:

This report focuses on the Hammocks in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes The market based on manufacturers, regions, type and application. The adoption rate of hammocks over camping tents is increasing among outdoor enthusiasts. Technavio's market research report identifies that the rising demand for hammocks from campers and outdoor enthusiasts will be one of the primary growth drivers for The global hammocks market till 2021. Consumers prefer hammocks because they are easy to install, lightweight, and can be carried on backpacking or hiking trips. Also, the characteristic of low storage space encourages campers to opt for camping hammocks over other camping accessories. Hammocks offer protection against groundwater. Consumers pack them into compressed flat packages and move them around easily because they are easy to wrap and launch. Furthermore, more consumers are participating in side country and backcountry travel with the rising trend of adventure tourism, which in turn, will boost the sales volume of hammocks.

The worldwide market for Hammocks is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
