The hand-cranked alarm is a hand-cranked sounder that does not require power supply support. The hand-cranked alarm does not require a power supply and can provide an effective alarm in places without power supply support. Just manually shake the handle clockwise until the speed reaches the primary level (50-80 rpm) to achieve the ideal alarm effect, and the sound can reach 2.5 kilometers. The sound produced is sharp, shocking and penetrating. The size of the alarm sound depends on the speed of the handle shaking. The new hand-operated alarm is equipped with a baffle shutter mechanism in the sound window, which can quickly close the sound window, block the sound, and generate different signals.
