Hand dryers are devices that are used in almost all hotel washrooms for hygienically drying hands. They are eco-friendly devices as they are instrumental in saving paper and towels. The demand for hand dryers in hotels and restaurants is increasing due to the rapid growth in the hospitality industry across the world. Moreover, they are more cost-effective in comparison with paper towels, with several hotels replacing paper towels with hand dryers, not only to reduce their operational costs but also to add sophistication. Moreover, the growth of the tourism industry has led to an increase in the number of hotels globally, which has also triggered the demand for hand dryers.
