Hand Hewn Log Homes are usually distinguished by the large logs used and the chinking (one-inch or larger bands of white or colored grout) that fills and seals spaces between logs. Handcrafters

often include other custom features such as hand-cut timber framed trusses, stairs, and railings. Sometimes hand crafters embellish timber components with decorative carving.

Hand Hewn Log Homes hold a special place in the history and development of the Western world. From the comfort of their log yards, handcrafters choose uniquely shaped logs that span the full length of a wall, then cut and notch each timber to fit one specific location in the structure. Once the cuts are made, erection is given a test run, as the handcrafter stacks the logs in the yard just as they would on site, to ensure a precise fit. The logs are then labeled, disassembled and trucked to the job site for construction.
