## Abstracts

The global Hand Soldering market size is expected to reach \$ 802 million by 2032, rising at a market growth of 3.4% CAGR during the forecast period (2026-2032).

Hand soldering is to connect two points. These points can be component or PCB layer or wire. Hand soldering melts a metal wire, called solder, and flows over the two points. Hand Soldering Iron is powered by electric power, which heats a rod, on tip of which the solder melts and helps to join. On cooling the points are together as solid. Soldering helps to connect electronic components to perform many functions.

The major manufacturers in the global Hand Soldering market are Weller (Ape Tool Group), JBC and Kurtz Ersa, etc. The top 1 manufacturer account for about 45% of the market share.

Europe is the largest market for hand soldering with about 40% market share, followed by China and Europe with about 23% and 20%. In terms of product, soldering station is the largest segment, with a share over 55%. And in terms of application, the largest application is electronics manufacturing, followed by electronics repairing.

This report studies the global Hand Soldering production, demand, key manufacturers, and key regions.
