A handheld airless sprayer is a portable paint sprayer that uses high-pressure airless technology to apply paint or other coatings. Unlike traditional paint sprayers that use compressed air to atomize and spray the paint, handheld airless sprayers use a high-pressure pump to force paint through a nozzle and onto the surface being painted. Handheld airless sprayers are popular among DIYers and professionals alike, as they offer a compact and easy-to-use solution for a wide range of painting projects. They can be used to spray a variety of coatings, including paint, stain, varnish, and clear coat.
