The global Handheld Compressor Nebulizers market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Compressor nebulizers, also known as jet nebulizers, are medical devices used to deliver liquid medication in the form of a fine mist or aerosol to the lungs for the treatment of respiratory conditions. These nebulizers operate by compressing air through a narrow tube, which draws liquid medication from a reservoir and converts it into an inhalable mist. Compressor nebulizers are commonly used in clinical settings and for home-based treatment of various respiratory disorders, including asthma, chronic obstructive pulmonary disease (COPD), and cystic fibrosis.
