According to our (Global Info Research) latest study, the global Handheld Police Radar Guns market size was valued at US\$ 83.83 million in 2025 and is forecast to a readjusted size of US\$ 112 million by 2032 with a CAGR of 4.2% during review period.

A handheld police radar gun is a compact, portable device used by law enforcement officers to measure the speed of moving vehicles, primarily for traffic enforcement. It typically uses Doppler radar or laser (LIDAR) technology to detect how fast a vehicle is moving, helping officers enforce speed limits and improve road safety.

As global road traffic and vehicle ownership continue to grow, especially in developing countries, the increase in vehicle usage has led to an increase in speeding and accident rates. Governments around the world continue to put forward road safety initiatives, and different national and regional governments (such as "Vision Zero" and EU Road Safety Policy) are promoting stricter speed enforcement. Handheld Police Radar Guns are cost-effective and easy to carry, making them an ideal choice for urban and rural law enforcement.

According to our data, the main manufacturers of Handheld Police Radar Guns worldwide include Stalker Radar (Applied Concepts), Laser Technology, Inc, Kustom Signals (MPD), MPH Industries (MPD), Decatur Electronics, Pacecat-Photoelectric Technology, DragonEye Technology, Qingdao Yizhuo Optoelectronic Technology, Xi'an Lei Tong Science & Technology, etc. In 2024, the top five manufacturers in the world will account for approximately 76.0% of the market share.

At present, there are two types of Handheld Police Radar Guns on the market: Doppler

radar and lidar. At present, Doppler radar speed guns are the most important subdivided products, with a market share of approximately 56% in 2024. LiDAR speed guns have higher target accuracy, better performance in traffic jams, and smaller size. Although traditional Doppler radar is still in use, it is gradually being replaced in urban environments. With the advancement of technology, the development from Doppler radar to LiDAR has become a general trend. In addition, the innovative products of various manufacturers cover functions such as video recording, GPS tracking, Bluetooth/Wi-Fi and data recording, which has promoted its popularity.

From a regional perspective, North America is the world's largest consumer market, with a market share of approximately 47% in 2024, followed by Europe. The continued investment of governments in smart cities and traffic management systems in the Asia-Pacific region has brought new growth opportunities to the market, and the overall market growth rate leads the world.

Handheld Police Radar Guns are expected to continue to grow driven by urbanization, traffic management needs and the development of smart cities. Technological progress and optimization of the competitive landscape will create more opportunities for market players, while addressing alternative technologies and cost challenges are key to future development.
