Abstracts

Handset Power Amplifiers used to support various operating modes like UMTS, CDMA, GSM/EDGE LTE and multiple frequency bands which offer premium performance with very small form factor. Most of the power amplifiers for the mobile applications are been manufactured using gallium arsenide based bipolar transistor and a comparatively small number of handset power amplifiers are being manufactured using silicon CMOS. CMOS does offer the tantalizing possibility of having much higher levels of integration and comparatively lower cost to GaAs. The growth of handset power amplifier market is highly reliant on the increasing internet penetration globally.

Scope of the Report:

This report focuses on the Handset Power Amplifiers in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes The market based on manufacturers, regions, type and application. Increased internet penetration is one of the major driver for the growth of the handset power amplifiers market. Growing demand for the higher network bandwidth and continuously increasing M2M communication are the key growth drivers for this market. Therefore, the continued global migration from 2G to 3G devices is also one of the main factor anticipated to catalyze the growing demand of different handset power amplifiers during the forecast period from 2017 to 2025. In addition, growth of the audio and video conference using the notebook platform is also anticipated to increase the demand of handset power amplifiers in the upcoming years. In turn this is also projected to affect The market of handset power amplifiers in a positive manner during the forecasted period.

In spite of many driving factors, the handset power amplifiers market is expected to

show a fluctuation in growth rate because of the more stringent requirement in performance, functionality, cost and size in multimode multiband power amplifier. The added complexity in the multi-band and multi-mode handsets is also one of the key restraining factor for handset power amplifiers market. Increase in the wafer size and rise in number of M&A is going to create significant opportunity for handset power amplifiers in coming years.

The worldwide market for Handset Power Amplifiers is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
