Hang gliding is an aerial recreational sports activity in which a pilot flies a light, non-motorized foot-launched glider. Most modern hang gliders are made of an aluminum alloy or composite frame covered with synthetic sailcloth to form a wing.

The increasing popularity of extreme sports activities is one of the primary factors that will trigger the growth of the hang gliding equipment market in the coming years. In the recent times, extreme sports activities such as hang gliding, bungee jumping, skydiving, surfing, jet skiing, and wakeboarding are gaining traction. A hectic lifestyle is leading to the rise of adrenalin-boosting activities as they are effective in de-stressing. More people are indulging in these extreme sports activities due to the physical and mental benefits they offer. The increase in recreational expenditure coupled with changing demographics and lifestyles are boosting the popularity of such activities.
