Abstracts

The global Hard Drive Degausser market size is expected to reach \$ 140 million by 2032, rising at a market growth of 4.9% CAGR during the forecast period (2026-2032).

Hard drives store information magnetically on a spinning platter about 30% smaller than a CD. They also keep small amounts of data stored within RAM (Random Access Memory) chips found elsewhere in the casing. The only method of completely eliminating that information is to blast the hard drive with a magnetic field. The machines that do this are called Degaussers.

Hard Drive Degaussers are used to de-magnetize a hard drive and therefore erase the data on it. Degaussing is an NSA approved method of data erasure for hard drives. It is recommended that after using a degausser, a drive destroyer device is used to complete the secure data destruction.

Degausser is a machine used to eliminate data stored on computer and laptop hard drives, floppy disks and magnetic tape, by randomly changing the alignment of magnetic domains on the medium.

Degaussing takes its meaning from Johann Gauss (1777-1855) a mathematician who studied and worked on electro-magnetic fields. Data is stored on magnetic media by making very small areas called magnetic domains change their magnetic alignment to be in the direction of an applied magnetic field. Degaussing magnetic media leaves the domains in random patterns with no preference to orientation, thereby rendering previous data unrecoverable. A degausser is therefore used to completely erase all audio, video and data signals from magnetic storage media.

Global Hard Drive Degausser key players include VS Security, Garner, Proton Data Security, Security Engineered Machinery, etc. Global top four manufacturers hold a share over 50%.

North America is the largest market, with a share over 45%, followed by Japan, and Europe, both have a share about 40 percent.

In terms of product, Capacitive Discharge Degaussers is the largest segment, with a share nearly 85%. And in terms of application, the largest application is Defense and Government, followed by Financial Company, Data Storage Company, Hospital, etc.
