High-speed rigid doors are industrial doors made of robust materials such as steel and aluminum alloys, featuring rapid opening and closing. They achieve rapid opening and closing through an electric drive system, possessing high wind resistance and sealing performance. They are widely used in high-frequency, high-security, and special environmental applications, such as industrial plants, warehouses, and cold chain logistics.

Upstream components mainly include steel, aluminum alloys, drive motors, control systems, sensors, and sealing materials; downstream applications cover industrial parks, logistics warehousing, e-commerce distribution centers, automobile manufacturing plants, cold chain warehouses, and food and pharmaceutical factories. The global average price of high-speed rigid doors is \$2,540 per unit, with sales of approximately 805,600 units and global production capacity of 850,000 units. The industry profit margin reaches 18%.
