According to our (Global Info Research) latest study, the global Harmonic Gear Drive market size was valued at USD 658.1 million in 2023 and is forecast to a readjusted size of USD 1019.9 million by 2030 with a CAGR of 6.5% during review period.

Harmonic Gear Drive is a compact, high performance, precision reduction gear. It is one of the key components used in robotic products such as collaborative work robots. The gear consists of only 3 basic parts (Wave Generator, Flex spline, and Circular Spline). It provides excellent features not found in other speed reducers.

Japan HDSI currently holds the core technology of harmonic drive reducers and forms a technical barrier to high-performance reducers. It is difficult for companies in other regions to reach their technical level. Due to the strong market demand in China, more and more Chinese companies have entered the industry, and many companies have expansion plans. For example, Shenzhen Han's Motion Technology is a good new entrant. In 2022, the sales volume of harmonic reducers has reached 98,080 units. In the United States, Canada, and South Korea also have R&D and production companies.
