Hatch cover tape is a tape specially designed for use in ships, containers or other industrial applications where a sealed hatch cover structure is required. Its main function is to provide a reliable sealing effect to prevent the intrusion of moisture, dust, gas or other harmful substances. Hatch Cover Tape is usually made of high-strength, wear-resistant and corrosion-resistant materials such as polyester film, polyvinyl chloride (PVC) or special synthetic rubber, which have excellent weather resistance and chemical corrosion resistance and can maintain stable performance in harsh marine environments. In ship transportation, the application of hatch cover tape is crucial. It is not only related to the cargo safety and transportation efficiency of the ship, but also directly affects the energy-saving and environmental protection performance of the ship. By using high-quality hatch cover tape, the loss and damage of cargo can be effectively reduced, the operating cost of the ship can be reduced, and the transportation efficiency can be improved.
