Abstracts

HDMI, which expands to High-Definition Multimedia Interface, was developed in 2002. It is a registered audio/video (A/V) interface that transfers video and audio data from a compliant source device (such as display controllers) to a display device (such as PC monitors, projectors, televisions, or digital audio devices).

Scope of the Report:

This report focuses on the HDMI and DisplayPort in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes The market based on manufacturers, regions, type and application. Owing to technological advances in the media and communications industry, the recent years have witnessed a rapid increase in the demand for high-quality video content, which will be one of the major factors that will have a positive impact on the growth of The market during the forecast period. The growth in broadband and mobile internet infrastructure, the growth in unit shipments of HD and 4K televisions, and the availability of high-end communication and entertainment devices will increase the consumption of HD and ultra-high definition (UHD) videos. This will subsequently increase the need for the compatibility of HD and UHD videos with devices such as televisions, laptops, and projectors, in turn, driving the demand for HDMI cables and DisplayPorts.

The worldwide market for HDMI and DisplayPort is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
