Abstracts

HDPE packaging is used in industries such as food, beverage, pharmaceuticals, and consumer goods. Its properties of stiffness, moldability, and chemical resistance make it suitable for use in making various types of packaging including bottles, containers, cartons, bags, and others. Almost 70% of HDPE produced is used in packaging, both flexible and rigid. Its inert nature and ability to preserve products for long periods of time make it a popular choice in the food and beverage sector. The material also allows for easy printing, which is an important criterion for product promotion.

Scope of the Report:

This report studies the HDPE Packaging market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the HDPE Packaging market by product type and applications/end industries.

The major properties of HDPE packaging include stiffness, moldability, and chemical resistance, which make it suitable for use in various types of packaging including bottles, containers, cartons, bags, and others. HDPE packaging products are more attractive as they offer more printing options over substitutes, such as polyethylene terephthalate (PET). HDPE packaging is available in different colors and helps in product differentiation. The colors of the packaging products increase the aesthetic value of the products and attract the attention of the consumer resulting in more sales of HDPE bottles.

One of the biggest advantages of HDPE is its ability to be recycled. Because of environmental concerns associated with the plastic usage, there are restrictions on the use of HDPE, which has necessitated the recycling trend in this market. The recycling of

HDPE packaging products makes it unique among many plastics used in the packaging industry. The developed countries such as the US and the UK have made crucial developments in recycling HDPE and have future targets to increase the recycling rate. Vendors are trying to achieve 80% recycling in HDPE milk bottles. APAC is expected to be the fastest-growing region in the HDPE packaging market and is likely to register a growth rate of 5% during the forecast period. China dominates the HDPE packaging market in APAC because of the large scale manufacturing activity in the country. Growth in the packaging market in countries such as Singapore, Vietnam, Malaysia, and Indonesia will boost the demand for HDPE packaging in APAC in the coming years.

The global HDPE Packaging market is valued at xx million USD in 2017 and is expected to reach xx million USD by the end of 2023, growing at a CAGR of xx% between 2017 and 2023.

The Asia-Pacific will occupy for more market share in following years, especially in China, also fast growing India and Southeast Asia regions.

North America, especially The United States, will still play an important role which cannot be ignored. Any changes from United States might affect the development trend of HDPE Packaging.
