An HUD is a display indicator that displays the key flight information onto a transparent screen positioned in front of a pilot's line of sight. HUD finds its applications in the automotive and aviation sectors. It helps increase the situational awareness and enhances safety margins in these sectors. The following are the primary components of an HUD: combiner, projector unit, display panel, and video generator.

Scope of the Report:

This report focuses on the Heads-Up Display (HUD) in Civil Aviation in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes The market based on manufacturers, regions, type and application.

The operational benefits of HUDs have encouraged commercial airlines such as China Eastern Airlines and Qatar Airways to equip their new fleets with HUDs. In 2013 China Eastern Airlines placed an order for 58 Boeing Next-Generation 737 aircraft installed with Rockwell Collins' HUD systems; in 2015, Qatar Airways announced that it would install HUDs in its A350 XWBs and A380 aircraft fleets. In the same year, China-based Hainan Airlines also announced the installation of Rockwell Collins' HUD systems in its next-generation Boeing 737 aircraft and flight simulators.

According to the report, OEMs in the aviation industry are adopting HUDs to improve the operational capabilities of aircraft. For instance, in winter when fog impedes visibility, HUDs can provide a pilot with better navigational capability and enable better control over the aircraft. HUDs also increase the capability of aircraft during other critical situations. The majority of the air accidents that occur during landing and take-off are due to collisions with other aircraft. Therefore civil aviation authorities are taking steps

such as introducing lower landing minima and mandating the implementation of HUDs in new aircraft fleets. This will increase the growth prospects of The market during the forecast period.

The worldwide market for Heads-Up Display (HUD) in Civil Aviation is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
