According to our (Global Info Research) latest study, the global Health Diaphragm Valves market size was valued at USD 206.8 million in 2023 and is forecast to a readjusted size of USD 272.5 million by 2030 with a CAGR of 4.0% during review period.

Diaphragm Valves (or membrane valves) consists of a valve body with two or more ports, a diaphragm, and a seat upon which the diaphragm closes the valve. The valve is constructed from either plastic or metal.

Health Diaphragm Valves have the reputation of being the “clean valves”. The health diaphragm isolates the process media from the environment and all moving parts of the valve and so protecting the media from contamination while preventing it from interfering with the valve operation. The properly chosen diaphragm also provides exceptional steam resistance and long term durability.

Global Health Diaphragm Valves key players include Crane, GEMU, ENG Valves (ITT), GEA, etc. Global top four manufacturers hold a share over 35%.

Europe is the largest market, with a share about 40%, followed by North America and Japan, both have a share about 33 percent.
