Abstracts

The global Health Products Analysis Service market size is expected to reach \$ 2544 million by 2032, rising at a market growth of 8.2% CAGR during the forecast period (2026-2032).

Health supplement analysis services refer to the services provided by third-party testing and certification bodies, professional laboratories, functional evaluation institutions, and compliance technical service organizations to health foods, dietary supplements, nutritional supplements, natural health products, sports nutrition products, plant extract preparations, and related raw and auxiliary materials. These services include component identification, determination of effective/marker ingredient content, nutritional component analysis, safety testing, contaminant screening, microbial testing, detection of illegally added and prohibited substances, stability testing, shelf-life studies, label claim verification, functional evaluation, and pre-certification testing.

From a demand structure perspective, growth is primarily driven by five factors: increased brand requirements for the authenticity of label claims and the stability of ingredient content; increased consumer and channel emphasis on third-party certification marks; stricter requirements for supplement compliance testing from cross-border e-commerce and large retail platforms; increased regulatory attention to evidence regarding illegal additives, heavy metals, microorganisms, pesticide residues, and functional claims; and increased demand for specialized methodologies in sub-categories such as sports nutrition, probiotics, fish oil, herbal supplements, melatonin, and coenzyme Q10. Due to the complexity of supplement product formulations, the global sourcing of raw materials, and significant batch variations, testing services have expanded from single-product sampling to raw material release, supplier audits, stability verification, label updates, post-market sampling, and certification maintenance.

This report studies the global Health Products Analysis Service demand, key companies, and key regions.

This report is a detailed and comprehensive analysis of the world market for Health Products Analysis Service, and provides market size (US\$ million) and Year-over-Year (YoY) growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Health Products Analysis Service that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Health Products Analysis Service total market, 2021-2032, (USD Million)

Global Health Products Analysis Service total market by region & country, CAGR, 2021-2032, (USD Million)

U.S. VS China: Health Products Analysis Service total market, key domestic companies, and share, (USD Million)

Global Health Products Analysis Service revenue by player, revenue and market share 2021-2026, (USD Million)

Global Health Products Analysis Service total market by Type, CAGR, 2021-2032, (USD Million)

Global Health Products Analysis Service total market by Application, CAGR, 2021-2032, (USD Million)

This report profiles major players in the global Health Products Analysis Service market based on the following parameters - company overview, revenue, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Eurofins Scientific SE, SGS SA, Intertek Group plc, NSF International, UL Solutions Inc., Bureau Veritas SA, Cotecna Inspection SA, BSCG, Pacific BioLabs, QIMA Life Sciences, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the world Health Products Analysis Service market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US\$

Millions), by player, by regions, by Type, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.
