## **Abstracts**

HSI is also known as imaging spectroscopy was originated from remote sensing and has been discovered for various applications by the National Aeronautics and Space Administration (NASA). It has an advantage of acquiring 2D images across a wide range of electromagnetic spectrum. HSI has wide applications in areas such as art conservation, vegetation, water resource control, archaeology, food quality, forensic medicine, crime scene detection, and forensic medicine. HSI technology is mainly used by the defense sector, government agencies, and non-military application sectors such as agriculture and mineral.

Scope of the Report:

This report focuses on the Healthcare Hyperspectral Imaging (HSI) Systems in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes The market based on manufacturers, regions, type and application.

The advanced medical imaging capabilities of hyperspectral imaging systems (HIS) will drive the growth prospects for The global healthcare HSI systems market from 2017 to 2021. The advanced medical imaging systems reduce the number of complications by improving the quality of medical procedures. Since hyperspectral medical imaging system analyzes the image to gather detailed information at the tissue, cellular, and molecular levels and is later used for screening, treatment, and diagnosis of various diseases, the demand for these imaging systems will increase in The market. Also, since it is a non-invasive test, HIS is gaining popularity among both patient pool and

specialists to carry out early diagnosis and the treatment of various diseases such as retinal diseases, oral cancer, and central nervous system disorders. The Americas dominated the healthcare HSI systems market during 2016 and is likely to experience a high growth rate during the projected period. The region dominates The market since the US was the first country to adopt HSI technology and contributes to the highest share of The market's revenue. Also, increased investments in the healthcare sector, will also fuel The market's growth prospects in this region.

The worldwide market for Healthcare Hyperspectral Imaging (HSI) Systems is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
