## Abstracts

The global Healthcare Performance Improvement and Management Service market size is expected to reach \$ 393 million by 2032, rising at a market growth of 7.0% CAGR during the forecast period (2026-2032).

Healthcare Performance Improvement and Management (HPIM) Service is a specialized, data-driven consulting and operational service designed to optimize the quality, efficiency, safety, and financial sustainability of healthcare organizations—including hospitals, clinics, long-term care facilities, and health systems. It integrates clinical best practices, process engineering, data analytics, and regulatory compliance frameworks to address gaps in care delivery, reduce operational waste, enhance patient outcomes, and align organizational performance with industry benchmarks and value-based care (VBC) requirements.

Unlike fragmented quality improvement initiatives, HPIM services take a holistic, end-to-end approach that spans clinical workflows, administrative operations, financial performance, and patient experience, with a focus on measurable, sustainable improvements rather than short-term fixes.

This report studies the global Healthcare Performance Improvement and Management Service demand, key companies, and key regions.

This report is a detailed and comprehensive analysis of the world market for Healthcare Performance Improvement and Management Service, and provides market size (US\$ million) and Year-over-Year (YoY) growth, considering 2025 as the base year.
