

Global Heat Exchanger Tube Expansion Machine Market 2026 by Manufacturers, Regions, Type and Application, Forecast to 2032

<https://marketpublishers.com/r/GC4891C2FD48EN.html>

Date: September 2026

Pages: 143

Price: US\$ 3,480.00 (Single User License)

ID: GC4891C2FD48EN

Abstracts

According to our (Global Info Research) latest study, the global Heat Exchanger Tube Expansion Machine market size was valued at US\$ 434 million in 2025 and is forecast to a readjusted size of US\$ 617 million by 2032 with a CAGR of 5.1% during review period.

Heat Exchanger Tube Expansion Machine refers to specialized industrial equipment used to establish controlled mechanical joints between heat-exchanger tubes and tubesheets during the fabrication, assembly, retubing and maintenance of shell-and-tube heat exchangers, condensers, boilers, feedwater heaters and other tubular heat-transfer equipment. The equipment applies controlled radial deformation to the tube within the tubesheet hole so that the tube wall develops the required contact pressure, mechanical retention and sealing performance. Major product configurations include electrically or pneumatically powered roller-expansion systems, hydraulic-drive rolling equipment, direct high-pressure hydraulic or water-expansion systems, and assisted or CNC-controlled expansion workstations. Key equipment elements typically include the drive or high-pressure power unit, torque or pressure control system, tube expander or expansion probe, tooling and associated positioning or control components. Equipment selection is influenced by tube diameter and wall thickness, tubesheet thickness, tube and tubesheet materials, joint design, required expansion depth, production volume and process consistency requirements. The research scope focuses on powered Heat Exchanger Tube Expansion Machine systems used for tube-to-tubesheet joining in new equipment manufacturing and aftermarket maintenance applications.

Key Findings

In 2025, global Heat Exchanger Tube Expansion Machine production reached approximately 9,178 Units. The average price is approximately \$46,000

Mechanical roller expansion remains the most established route, while hydraulic and water-pressure systems address higher-specification applications

India and China have the densest regional SME supplier bases, while developed markets retain stronger premium-equipment capabilities

Demand is supported by both new heat exchanger fabrication and recurring retubing, overhaul and maintenance activities

Market Trends

The development of the Heat Exchanger Tube Expansion Machine market is increasingly centered on process consistency, digital control and automation rather than fundamental changes to the tube-expansion principle. Conventional mechanical rolling remains widely applicable, but newer systems are progressively incorporating electronic torque measurement, servo drives, automatic lubrication, programmable expansion parameters and process-data recording to reduce variation caused by operator technique. At the higher end of the market, direct hydraulic and ultra-high-pressure water expansion are gaining strategic importance for thick tubesheets, long expansion zones, multiple-tubesheet structures and applications requiring more uniform radial loading. Automation is also moving beyond individual expansion tools toward assisted systems and CNC workstations capable of integrating tube positioning, expansion and adjacent tube-end operations. Maus Italia already offers automatic and CNC tube-expansion solutions, while Elliott has expanded its assisted rolling platform with electronic torque control and servo-based technology; Sugino combines powered rolling equipment with high-pressure expansion technologies. The long-term product direction is therefore toward higher repeatability, traceability, ergonomic operation and integration with broader heat-exchanger manufacturing workflows.

Market Dynamics

Drivers

Demand for Heat Exchanger Tube Expansion Machine is supported by the large

installed base of shell-and-tube heat-transfer equipment across refining, petrochemicals, chemicals, conventional and nuclear power, boilers, industrial refrigeration, desalination and other process industries. Tube-to-tubesheet joints are critical to the integrity and operating life of tubular heat exchangers, creating recurring requirements for controlled expansion during both initial fabrication and subsequent retubing or overhaul. Increasing emphasis on production consistency and quality documentation is also encouraging manufacturers to replace highly operator-dependent processes with torque-controlled, pressure-controlled and assisted expansion systems. Another structural driver is the growing complexity of heat exchangers: thicker tubesheets, demanding tube materials and higher-specification applications increase the value of equipment capable of controlling expansion force and depth more accurately. TEMA specifications continue to recognize tube-to-tubesheet joint design as a core consideration in shell-and-tube heat exchangers, supporting the long-term relevance of specialized joining and fabrication equipment.

Restraints

The principal restraint is the mature nature of the underlying fabrication process. Basic mechanical expansion equipment has a relatively long service life, and many standard applications can continue to be served by conventional portable systems, limiting replacement frequency. The market is also characterized by low-volume and highly application-specific purchasing compared with mass-production machinery categories, because equipment selection depends on tube size, wall thickness, tubesheet geometry, materials and required joint properties. In cost-sensitive projects, customers may continue using existing pneumatic or electric rolling systems rather than adopting higher-priced hydraulic or automated solutions. Alternative heat-exchanger architectures, including plate-type and other compact designs, reduce the addressable requirement for tube-to-tubesheet expansion in certain applications, while welded or combined welded-and-expanded joints can change the equipment mix in high-integrity projects. These factors limit the potential for rapid volume expansion even where the value per system is increasing.

Opportunities

The strongest opportunities are concentrated in equipment upgrading rather than simple replication of conventional tube rolling systems. High-pressure hydraulic and water-expansion technologies offer additional potential in thick-tubesheet, large-diameter, long-expansion and multi-tubesheet applications where uniformity and process control

become more important. Assisted and CNC systems also create opportunities for heat-exchanger manufacturers seeking higher throughput, reduced dependence on experienced operators and more consistent process records. The aftermarket represents another attractive area because retubing, life-extension and major overhaul programs require expansion equipment even when new heat-exchanger investment is cyclical. Regional localization also creates opportunities for manufacturers able to combine competitive manufacturing costs with better control systems and application engineering. In China and India, the presence of numerous regional manufacturers provides a base for movement from basic electric or hydraulic equipment toward higher-value digitally controlled systems, while international specialists can compete through automation, application know-how and high-specification solutions.

Challenges

The industry faces a persistent challenge in balancing process precision with equipment cost. Tube expansion performance depends not only on the machine but also on tube material, wall thickness, tubesheet-hole geometry, clearances, surface condition, groove design and expansion parameters, meaning that equipment cannot be treated as a fully standardized commodity. Incorrect pressure or rolling settings can result in under-expansion, over-expansion, tube thinning, local damage or inconsistent joint performance. Hydraulic expansion further requires reliable sealing and close dimensional matching between the tube and tubesheet hole. At the commercial level, regional price competition is intense because basic powered expansion systems can be supplied by numerous small manufacturers, while advanced systems require stronger engineering, calibration, application support and after-sales capabilities. Manufacturers therefore need to differentiate through process know-how and lifecycle support rather than hardware alone.

Industry Chain Analysis

The upstream supply chain for Heat Exchanger Tube Expansion Machine includes precision steels and wear-resistant materials for expanders, rolls and mandrels; electric and pneumatic drives; hydraulic pumps, boosters, valves and high-pressure hoses; seals and pressure-resistant components; sensors, torque-control devices, controllers and servo systems; and machined structural components. For conventional rolling systems, tooling precision, durability and compatibility with different tube sizes are important cost and performance factors. Hydraulic and water-expansion systems place

greater emphasis on high-pressure pumps, seals, pressure-control components and safety design, while automatic systems add servo motion, numerical control, machine vision or positioning hardware. These different technology architectures create a wide range of equipment value levels within the same market.

The midstream comprises specialist Heat Exchanger Tube Expansion Machine manufacturers responsible for system design, tooling development, machining, assembly, calibration, application testing and after-sales service. Value creation increasingly comes from matching expansion parameters and tooling to specific tube-to-tubesheet conditions rather than simply supplying a motor or pressure unit. Downstream customers include shell-and-tube heat exchanger manufacturers, pressure-vessel and boiler fabricators, condenser and feedwater-heater manufacturers, engineering contractors and maintenance or retubing operators. New-equipment projects generate initial equipment demand, while the large installed base of tubular heat-transfer assets creates recurring demand for replacement tooling, system refurbishment and maintenance-related expansion equipment. This aftermarket component reduces, but does not eliminate, the cyclical nature associated with capital investment in process industries.

Segment Insights

By expansion mechanism, mechanical roller expansion represents the broadest and most mature segment of the Heat Exchanger Tube Expansion Machine market because it can cover a wide range of conventional heat-exchanger, condenser and boiler applications using electric, pneumatic or hydraulic drives. Its established tooling ecosystem, portable form factor and comparatively moderate investment requirement support a large installed base. Direct hydraulic or water-pressure expansion represents a smaller but higher-value specialized segment. Instead of relying on roller contact, these systems use controlled high-pressure fluid to deform the tube against the tubesheet hole, providing a technology option for thick tubesheets, long expansion sections and applications where uniform circumferential loading is particularly important. Mechanical and direct hydraulic approaches are therefore more complementary than purely substitutive, with equipment selection driven by joint design and production requirements.

By automation level, portable powered systems continue to form the foundation of industry demand, particularly in maintenance, retubing and flexible low-to-medium-volume fabrication. Assisted and semi-automatic systems occupy an increasingly

important middle position by adding torque control, automatic lubrication, operator support and process-data functions without requiring a fully automated production cell. Fully automatic and CNC systems remain a more specialized segment but capture significantly higher equipment value and are most relevant to manufacturers with repetitive tube-bundle production and stronger requirements for throughput and consistency. From a lifecycle perspective, both new-equipment fabrication and aftermarket retubing are structurally important, giving the industry a more balanced demand profile than a market dependent solely on new capital projects.

Downstream Market Opportunities

The principal downstream opportunity remains the broad installed base of shell-and-tube heat exchangers and other tubular heat-transfer equipment used in process and energy industries. New fabrication demand is linked to investment in refining, chemicals, power equipment, industrial cooling, desalination and other infrastructure requiring robust tubular heat exchangers, while maintenance demand is generated by corrosion, erosion, leakage, tube degradation and scheduled overhaul of existing assets. High-integrity applications create particularly attractive opportunities because customers place greater value on repeatable expansion parameters, joint reliability, process records and compatibility with welded or combined tube-to-tubesheet joints. Retubing and life-extension projects also provide a recurring market independent of greenfield equipment construction, benefiting portable and assisted systems used at fabrication shops and field-maintenance locations. The most attractive downstream opportunities are therefore those where downtime costs, joint reliability and process repeatability outweigh the initial equipment-purchase price.

Regional Insights

Regional market characteristics differ significantly between premium technology supply and the density of regional manufacturers. North America and Europe have established specialist suppliers with strong positions in tube-tool installed bases, hydraulic expansion, assisted rolling and automated heat-exchanger production systems. Japan has fewer identifiable specialist suppliers but maintains a strong position in precision industrial equipment and advanced expansion technology through established manufacturers. China and India present a more fragmented supply structure, with a considerably larger population of regional and privately held manufacturers supplying electric, pneumatic and hydraulic systems at multiple price points. The current

manufacturer universe shows particularly dense SME participation in these two countries, supporting localization and price competition while gradually broadening access to higher-pressure and digitally controlled equipment.

From a demand perspective, opportunities are closely linked to regional investment in process industries and to the installed base requiring repair and retubing. Developed industrial markets offer relatively attractive replacement and automation opportunities because customers increasingly value productivity, ergonomics and process traceability, while expanding manufacturing bases in Asia create opportunities in both new heat-exchanger fabrication and localization of equipment supply. The regional competitive structure is therefore unlikely to converge into a single model: premium international specialists are expected to retain advantages in advanced control, automation and difficult applications, while regional Asian manufacturers compete effectively in standard systems and increasingly move into higher-specification hydraulic and digitally controlled products.

Competitive Landscape Analysis

The Heat Exchanger Tube Expansion Machine market has a fragmented competitive structure in which a limited group of internationally recognized specialists coexists with numerous regional manufacturers, particularly in India and China. Maus Italia, Sugino Machine, Elliott Tool Technologies, POWERMASTER, KRAIS Tube Expanders, HydroSwage, HydroPro and Thomas C. Wilson represent established participants with differentiated capabilities spanning mechanical rolling, electronic torque control, direct hydraulic expansion and automated systems, while the broader core manufacturer pool includes a large number of smaller companies competing through cost, customization, delivery flexibility and regional service. Product strategy is increasingly separating suppliers into two competitive groups. Standard equipment manufacturers compete primarily on price, range of tube sizes, ease of operation and local availability, whereas higher-end suppliers compete on expansion repeatability, pressure or torque control, data traceability, automation and application engineering. Automated CNC tube-expansion workstations, servo-assisted rolling and high-pressure hydraulic technologies are raising the value of engineering and software integration relative to basic hardware. The market is therefore expected to remain fragmented in standard equipment while becoming more technology differentiated in high-specification applications, with international specialists defending premium positions and selected Chinese and Indian manufacturers progressively moving toward more sophisticated systems.

Report Scope

This report is a detailed and comprehensive analysis for global Heat Exchanger Tube Expansion Machine market. Both quantitative and qualitative analyses are presented by manufacturers, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

Key Features:

Global Heat Exchanger Tube Expansion Machine market size and forecasts, in consumption value (\$ Million), sales quantity (Units), and average selling prices (US\$/Unit), 2021-2032

Global Heat Exchanger Tube Expansion Machine market size and forecasts by region and country, in consumption value (\$ Million), sales quantity (Units), and average selling prices (US\$/Unit), 2021-2032

Global Heat Exchanger Tube Expansion Machine market size and forecasts, by Type and by Application, in consumption value (\$ Million), sales quantity (Units), and average selling prices (US\$/Unit), 2021-2032

Global Heat Exchanger Tube Expansion Machine market shares of main players, shipments in revenue (\$ Million), sales quantity (Units), and ASP (US\$/Unit), 2021-2026

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for Heat Exchanger Tube Expansion Machine

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global Heat Exchanger Tube Expansion Machine market based on the following parameters - company overview, sales quantity, revenue, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Maus Italia S.p.A., Sugino Machine Limited, Elliott Tool Technologies, POWERMASTER LTD., HydroSwage International, LLC, HydroPro, Inc., KRAIS Tube Expanders, Thomas C. Wilson, LLC, Tritorc, Shingare Industries Pvt Ltd, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Heat Exchanger Tube Expansion Machine market is split by Type and by Application. For the period 2021-2032, the growth among segments provides accurate calculations and forecasts for consumption value by Type, and by Application in terms of volume and value. This analysis can help you expand your business by targeting qualified niche markets.

Market Segmentation

Market segment by Type

Mechanical Roller Expansion

Water Expansion

Hybrid Expansion

Others

Market segment by Automation Level

Portable Powered System

Semi-Automatic System

CNC System

Others

Market segment by Rated Maximum Tube-to-Tubesheet Expansion Pressure

Low-Pressure Type: ≤ 150 Mpa

Medium-Pressure Type: 150–300 Mpa

High-Pressure Type: 300–600 Mpa

Ultra-High-Pressure Type: > 600 Mpa

Market segment by Application

HVAC and Refrigeration Industry

Electric Power and Energy Industry

Petroleum and Fine Chemical Industry

Others

Major players covered

Maus Italia S.p.A.

Sugino Machine Limited

Elliott Tool Technologies

POWERMASTER LTD.

HydroSwage International, LLC

HydroPro, Inc.

KRAIS Tube Expanders

Thomas C. Wilson, LLC

Tritorc

Shingare Industries Pvt Ltd

Market segment by region, regional analysis covers

North America (United States, Canada, and Mexico)

Europe (Germany, France, United Kingdom, Russia, Italy, and Rest of Europe)

Asia-Pacific (China, Japan, Korea, India, Southeast Asia, and Australia)

South America (Brazil, Argentina, Colombia, and Rest of South America)

Middle East & Africa (Saudi Arabia, UAE, Egypt, South Africa, and Rest of Middle East & Africa)

Chapter Outline

Chapter 1, to describe Heat Exchanger Tube Expansion Machine product scope, market overview, market estimation caveats and base year.

Chapter 2, to profile the top manufacturers of Heat Exchanger Tube Expansion Machine, with price, sales quantity, revenue, and global market share of Heat Exchanger Tube Expansion Machine from 2021 to 2026.

Chapter 3, the Heat Exchanger Tube Expansion Machine competitive situation, sales quantity, revenue, and global market share of top manufacturers are analyzed emphatically by landscape contrast.

Chapter 4, the Heat Exchanger Tube Expansion Machine breakdown data are shown at the regional level, to show the sales quantity, consumption value, and growth by regions, from 2021 to 2032.

Chapter 5 and 6, to segment the sales by Type and by Application, with sales market share and growth rate by Type, by Application, from 2021 to 2032.

Chapter 7, 8, 9, 10 and 11, to break the sales data at the country level, with sales quantity, consumption value, and market share for key countries in the world, from 2021 to 2026. and Heat Exchanger Tube Expansion Machine market forecast, by regions, by Type, and by Application, with sales and revenue, from 2027 to 2032.

Chapter 12, market dynamics, drivers, restraints, trends, and Porters Five Forces analysis.

Chapter 13, the key raw materials and key suppliers, and industry chain of Heat

Exchanger Tube Expansion Machine.

Chapter 14 and 15, to describe Heat Exchanger Tube Expansion Machine sales channel, distributors, customers, research findings and conclusion.

Contents

1 MARKET OVERVIEW

1.1 Product Overview and Scope

1.2 Market Estimation Caveats and Base Year

1.3 Market Analysis by Type

1.3.1 Overview: Global Heat Exchanger Tube Expansion Machine Consumption Value by Type: 2021 Versus 2025 Versus 2032

1.3.2 Mechanical Roller Expansion

1.3.3 Water Expansion

1.3.4 Hybrid Expansion

1.3.5 Others

1.4 Market Analysis by Automation Level

1.4.1 Overview: Global Heat Exchanger Tube Expansion Machine Consumption Value by Automation Level: 2021 Versus 2025 Versus 2032

1.4.2 Portable Powered System

1.4.3 Semi-Automatic System

1.4.4 CNC System

1.4.5 Others

1.5 Market Analysis by Rated Maximum Tube-to-Tubesheet Expansion Pressure

1.5.1 Overview: Global Heat Exchanger Tube Expansion Machine Consumption Value by Rated Maximum Tube-to-Tubesheet Expansion Pressure: 2021 Versus 2025 Versus 2032

1.5.2 Low-Pressure Type: ?150 Mpa

1.5.3 Medium-Pressure Type: 150–300 Mpa

1.5.4 High-Pressure Type: 300–600 Mpa

1.5.5 Ultra-High-Pressure Type: >600 Mpa

1.6 Market Analysis by Application

1.6.1 Overview: Global Heat Exchanger Tube Expansion Machine Consumption Value by Application: 2021 Versus 2025 Versus 2032

1.6.2 HVAC and Refrigeration Industry

1.6.3 Electric Power and Energy Industry

1.6.4 Petroleum and Fine Chemical Industry

1.6.5 Others

1.7 Global Heat Exchanger Tube Expansion Machine Market Size & Forecast

1.7.1 Global Heat Exchanger Tube Expansion Machine Consumption Value (2021 & 2025 & 2032)

1.7.2 Global Heat Exchanger Tube Expansion Machine Sales Quantity (2021-2032)

1.7.3 Global Heat Exchanger Tube Expansion Machine Average Price (2021-2032)

2 MANUFACTURERS PROFILES

2.1 Maus Italia S.p.A.

2.1.1 Maus Italia S.p.A. Details

2.1.2 Maus Italia S.p.A. Major Business

2.1.3 Maus Italia S.p.A. Heat Exchanger Tube Expansion Machine Product and Services

2.1.4 Maus Italia S.p.A. Heat Exchanger Tube Expansion Machine Sales Quantity, Average Price, Revenue, Gross Margin and Market Share (2021-2026)

2.1.5 Maus Italia S.p.A. Recent Developments/Updates

2.2 Sugino Machine Limited

2.2.1 Sugino Machine Limited Details

2.2.2 Sugino Machine Limited Major Business

2.2.3 Sugino Machine Limited Heat Exchanger Tube Expansion Machine Product and Services

2.2.4 Sugino Machine Limited Heat Exchanger Tube Expansion Machine Sales Quantity, Average Price, Revenue, Gross Margin and Market Share (2021-2026)

2.2.5 Sugino Machine Limited Recent Developments/Updates

2.3 Elliott Tool Technologies

2.3.1 Elliott Tool Technologies Details

2.3.2 Elliott Tool Technologies Major Business

2.3.3 Elliott Tool Technologies Heat Exchanger Tube Expansion Machine Product and Services

2.3.4 Elliott Tool Technologies Heat Exchanger Tube Expansion Machine Sales Quantity, Average Price, Revenue, Gross Margin and Market Share (2021-2026)

2.3.5 Elliott Tool Technologies Recent Developments/Updates

2.4 POWERMASTER LTD.

2.4.1 POWERMASTER LTD. Details

2.4.2 POWERMASTER LTD. Major Business

2.4.3 POWERMASTER LTD. Heat Exchanger Tube Expansion Machine Product and Services

2.4.4 POWERMASTER LTD. Heat Exchanger Tube Expansion Machine Sales Quantity, Average Price, Revenue, Gross Margin and Market Share (2021-2026)

2.4.5 POWERMASTER LTD. Recent Developments/Updates

2.5 HydroSwege International, LLC

2.5.1 HydroSwege International, LLC Details

2.5.2 HydroSwege International, LLC Major Business

2.5.3 HydroSwage International, LLC Heat Exchanger Tube Expansion Machine Product and Services

2.5.4 HydroSwage International, LLC Heat Exchanger Tube Expansion Machine Sales Quantity, Average Price, Revenue, Gross Margin and Market Share (2021-2026)

2.5.5 HydroSwage International, LLC Recent Developments/Updates

2.6 HydroPro, Inc.

2.6.1 HydroPro, Inc. Details

2.6.2 HydroPro, Inc. Major Business

2.6.3 HydroPro, Inc. Heat Exchanger Tube Expansion Machine Product and Services

2.6.4 HydroPro, Inc. Heat Exchanger Tube Expansion Machine Sales Quantity, Average Price, Revenue, Gross Margin and Market Share (2021-2026)

2.6.5 HydroPro, Inc. Recent Developments/Updates

2.7 KRAIS Tube Expanders

2.7.1 KRAIS Tube Expanders Details

2.7.2 KRAIS Tube Expanders Major Business

2.7.3 KRAIS Tube Expanders Heat Exchanger Tube Expansion Machine Product and Services

2.7.4 KRAIS Tube Expanders Heat Exchanger Tube Expansion Machine Sales Quantity, Average Price, Revenue, Gross Margin and Market Share (2021-2026)

2.7.5 KRAIS Tube Expanders Recent Developments/Updates

2.8 Thomas C. Wilson, LLC

2.8.1 Thomas C. Wilson, LLC Details

2.8.2 Thomas C. Wilson, LLC Major Business

2.8.3 Thomas C. Wilson, LLC Heat Exchanger Tube Expansion Machine Product and Services

2.8.4 Thomas C. Wilson, LLC Heat Exchanger Tube Expansion Machine Sales Quantity, Average Price, Revenue, Gross Margin and Market Share (2021-2026)

2.8.5 Thomas C. Wilson, LLC Recent Developments/Updates

2.9 Tritorc

2.9.1 Tritorc Details

2.9.2 Tritorc Major Business

2.9.3 Tritorc Heat Exchanger Tube Expansion Machine Product and Services

2.9.4 Tritorc Heat Exchanger Tube Expansion Machine Sales Quantity, Average Price, Revenue, Gross Margin and Market Share (2021-2026)

2.9.5 Tritorc Recent Developments/Updates

2.10 Shingare Industries Pvt Ltd

2.10.1 Shingare Industries Pvt Ltd Details

2.10.2 Shingare Industries Pvt Ltd Major Business

2.10.3 Shingare Industries Pvt Ltd Heat Exchanger Tube Expansion Machine Product

and Services

2.10.4 Shingare Industries Pvt Ltd Heat Exchanger Tube Expansion Machine Sales Quantity, Average Price, Revenue, Gross Margin and Market Share (2021-2026)

2.10.5 Shingare Industries Pvt Ltd Recent Developments/Updates

2.11 Suncenter

2.11.1 Suncenter Details

2.11.2 Suncenter Major Business

2.11.3 Suncenter Heat Exchanger Tube Expansion Machine Product and Services

2.11.4 Suncenter Heat Exchanger Tube Expansion Machine Sales Quantity, Average Price, Revenue, Gross Margin and Market Share (2021-2026)

2.11.5 Suncenter Recent Developments/Updates

2.12 Subzero Tube Tools

2.12.1 Subzero Tube Tools Details

2.12.2 Subzero Tube Tools Major Business

2.12.3 Subzero Tube Tools Heat Exchanger Tube Expansion Machine Product and Services

2.12.4 Subzero Tube Tools Heat Exchanger Tube Expansion Machine Sales Quantity, Average Price, Revenue, Gross Margin and Market Share (2021-2026)

2.12.5 Subzero Tube Tools Recent Developments/Updates

2.13 Changzhou Tongming

2.13.1 Changzhou Tongming Details

2.13.2 Changzhou Tongming Major Business

2.13.3 Changzhou Tongming Heat Exchanger Tube Expansion Machine Product and Services

2.13.4 Changzhou Tongming Heat Exchanger Tube Expansion Machine Sales Quantity, Average Price, Revenue, Gross Margin and Market Share (2021-2026)

2.13.5 Changzhou Tongming Recent Developments/Updates

2.14 Yuechang Machinery Jiangsu

2.14.1 Yuechang Machinery Jiangsu Details

2.14.2 Yuechang Machinery Jiangsu Major Business

2.14.3 Yuechang Machinery Jiangsu Heat Exchanger Tube Expansion Machine Product and Services

2.14.4 Yuechang Machinery Jiangsu Heat Exchanger Tube Expansion Machine Sales Quantity, Average Price, Revenue, Gross Margin and Market Share (2021-2026)

2.14.5 Yuechang Machinery Jiangsu Recent Developments/Updates

2.15 Tubeex Engineering

2.15.1 Tubeex Engineering Details

2.15.2 Tubeex Engineering Major Business

2.15.3 Tubeex Engineering Heat Exchanger Tube Expansion Machine Product and

Services

2.15.4 Tubeex Engineering Heat Exchanger Tube Expansion Machine Sales Quantity, Average Price, Revenue, Gross Margin and Market Share (2021-2026)

2.15.5 Tubeex Engineering Recent Developments/Updates

2.16 Torso Tools

2.16.1 Torso Tools Details

2.16.2 Torso Tools Major Business

2.16.3 Torso Tools Heat Exchanger Tube Expansion Machine Product and Services

2.16.4 Torso Tools Heat Exchanger Tube Expansion Machine Sales Quantity, Average Price, Revenue, Gross Margin and Market Share (2021-2026)

2.16.5 Torso Tools Recent Developments/Updates

2.17 Hefei Lanbo

2.17.1 Hefei Lanbo Details

2.17.2 Hefei Lanbo Major Business

2.17.3 Hefei Lanbo Heat Exchanger Tube Expansion Machine Product and Services

2.17.4 Hefei Lanbo Heat Exchanger Tube Expansion Machine Sales Quantity, Average Price, Revenue, Gross Margin and Market Share (2021-2026)

2.17.5 Hefei Lanbo Recent Developments/Updates

2.18 Shandong Saisite

2.18.1 Shandong Saisite Details

2.18.2 Shandong Saisite Major Business

2.18.3 Shandong Saisite Heat Exchanger Tube Expansion Machine Product and Services

2.18.4 Shandong Saisite Heat Exchanger Tube Expansion Machine Sales Quantity, Average Price, Revenue, Gross Margin and Market Share (2021-2026)

2.18.5 Shandong Saisite Recent Developments/Updates

2.19 Niksu Power Tools

2.19.1 Niksu Power Tools Details

2.19.2 Niksu Power Tools Major Business

2.19.3 Niksu Power Tools Heat Exchanger Tube Expansion Machine Product and Services

2.19.4 Niksu Power Tools Heat Exchanger Tube Expansion Machine Sales Quantity, Average Price, Revenue, Gross Margin and Market Share (2021-2026)

2.19.5 Niksu Power Tools Recent Developments/Updates

2.20 DBX TOOLS

2.20.1 DBX TOOLS Details

2.20.2 DBX TOOLS Major Business

2.20.3 DBX TOOLS Heat Exchanger Tube Expansion Machine Product and Services

2.20.4 DBX TOOLS Heat Exchanger Tube Expansion Machine Sales Quantity,

Average Price, Revenue, Gross Margin and Market Share (2021-2026)

2.20.5 DBX TOOLS Recent Developments/Updates

3 COMPETITIVE ENVIRONMENT: HEAT EXCHANGER TUBE EXPANSION MACHINE BY MANUFACTURER

3.1 Global Heat Exchanger Tube Expansion Machine Sales Quantity by Manufacturer (2021-2026)

3.2 Global Heat Exchanger Tube Expansion Machine Revenue by Manufacturer (2021-2026)

3.3 Global Heat Exchanger Tube Expansion Machine Average Price by Manufacturer (2021-2026)

3.4 Market Share Analysis (2025)

3.4.1 Producer Shipments of Heat Exchanger Tube Expansion Machine by Manufacturer Revenue (\$MM) and Market Share (%): 2025

3.4.2 Top 3 Heat Exchanger Tube Expansion Machine Manufacturer Market Share in 2025

3.4.3 Top 6 Heat Exchanger Tube Expansion Machine Manufacturer Market Share in 2025

3.5 Heat Exchanger Tube Expansion Machine Market: Overall Company Footprint Analysis

3.5.1 Heat Exchanger Tube Expansion Machine Market: Region Footprint

3.5.2 Heat Exchanger Tube Expansion Machine Market: Company Product Type Footprint

3.5.3 Heat Exchanger Tube Expansion Machine Market: Company Product Application Footprint

3.6 New Market Entrants and Barriers to Market Entry

3.7 Mergers, Acquisition, Agreements, and Collaborations

4 CONSUMPTION ANALYSIS BY REGION

4.1 Global Heat Exchanger Tube Expansion Machine Market Size by Region

4.1.1 Global Heat Exchanger Tube Expansion Machine Sales Quantity by Region (2021-2032)

4.1.2 Global Heat Exchanger Tube Expansion Machine Consumption Value by Region (2021-2032)

4.1.3 Global Heat Exchanger Tube Expansion Machine Average Price by Region (2021-2032)

4.2 North America Heat Exchanger Tube Expansion Machine Consumption Value

(2021-2032)

4.3 Europe Heat Exchanger Tube Expansion Machine Consumption Value (2021-2032)

4.4 Asia-Pacific Heat Exchanger Tube Expansion Machine Consumption Value
(2021-2032)

4.5 South America Heat Exchanger Tube Expansion Machine Consumption Value
(2021-2032)

4.6 Middle East & Africa Heat Exchanger Tube Expansion Machine Consumption Value
(2021-2032)

5 MARKET SEGMENT BY TYPE

5.1 Global Heat Exchanger Tube Expansion Machine Sales Quantity by Type
(2021-2032)

5.2 Global Heat Exchanger Tube Expansion Machine Consumption Value by Type
(2021-2032)

5.3 Global Heat Exchanger Tube Expansion Machine Average Price by Type
(2021-2032)

6 MARKET SEGMENT BY APPLICATION

6.1 Global Heat Exchanger Tube Expansion Machine Sales Quantity by Application
(2021-2032)

6.2 Global Heat Exchanger Tube Expansion Machine Consumption Value by
Application (2021-2032)

6.3 Global Heat Exchanger Tube Expansion Machine Average Price by Application
(2021-2032)

7 NORTH AMERICA

7.1 North America Heat Exchanger Tube Expansion Machine Sales Quantity by Type
(2021-2032)

7.2 North America Heat Exchanger Tube Expansion Machine Sales Quantity by
Application (2021-2032)

7.3 North America Heat Exchanger Tube Expansion Machine Market Size by Country
7.3.1 North America Heat Exchanger Tube Expansion Machine Sales Quantity by
Country (2021-2032)

7.3.2 North America Heat Exchanger Tube Expansion Machine Consumption Value by
Country (2021-2032)

7.3.3 United States Market Size and Forecast (2021-2032)

7.3.4 Canada Market Size and Forecast (2021-2032)

7.3.5 Mexico Market Size and Forecast (2021-2032)

8 EUROPE

8.1 Europe Heat Exchanger Tube Expansion Machine Sales Quantity by Type (2021-2032)

8.2 Europe Heat Exchanger Tube Expansion Machine Sales Quantity by Application (2021-2032)

8.3 Europe Heat Exchanger Tube Expansion Machine Market Size by Country

8.3.1 Europe Heat Exchanger Tube Expansion Machine Sales Quantity by Country (2021-2032)

8.3.2 Europe Heat Exchanger Tube Expansion Machine Consumption Value by Country (2021-2032)

8.3.3 Germany Market Size and Forecast (2021-2032)

8.3.4 France Market Size and Forecast (2021-2032)

8.3.5 United Kingdom Market Size and Forecast (2021-2032)

8.3.6 Russia Market Size and Forecast (2021-2032)

8.3.7 Italy Market Size and Forecast (2021-2032)

9 ASIA-PACIFIC

9.1 Asia-Pacific Heat Exchanger Tube Expansion Machine Sales Quantity by Type (2021-2032)

9.2 Asia-Pacific Heat Exchanger Tube Expansion Machine Sales Quantity by Application (2021-2032)

9.3 Asia-Pacific Heat Exchanger Tube Expansion Machine Market Size by Region

9.3.1 Asia-Pacific Heat Exchanger Tube Expansion Machine Sales Quantity by Region (2021-2032)

9.3.2 Asia-Pacific Heat Exchanger Tube Expansion Machine Consumption Value by Region (2021-2032)

9.3.3 China Market Size and Forecast (2021-2032)

9.3.4 Japan Market Size and Forecast (2021-2032)

9.3.5 South Korea Market Size and Forecast (2021-2032)

9.3.6 India Market Size and Forecast (2021-2032)

9.3.7 Southeast Asia Market Size and Forecast (2021-2032)

9.3.8 Australia Market Size and Forecast (2021-2032)

10 SOUTH AMERICA

10.1 South America Heat Exchanger Tube Expansion Machine Sales Quantity by Type (2021-2032)

10.2 South America Heat Exchanger Tube Expansion Machine Sales Quantity by Application (2021-2032)

10.3 South America Heat Exchanger Tube Expansion Machine Market Size by Country

10.3.1 South America Heat Exchanger Tube Expansion Machine Sales Quantity by Country (2021-2032)

10.3.2 South America Heat Exchanger Tube Expansion Machine Consumption Value by Country (2021-2032)

10.3.3 Brazil Market Size and Forecast (2021-2032)

10.3.4 Argentina Market Size and Forecast (2021-2032)

11 MIDDLE EAST & AFRICA

11.1 Middle East & Africa Heat Exchanger Tube Expansion Machine Sales Quantity by Type (2021-2032)

11.2 Middle East & Africa Heat Exchanger Tube Expansion Machine Sales Quantity by Application (2021-2032)

11.3 Middle East & Africa Heat Exchanger Tube Expansion Machine Market Size by Country

11.3.1 Middle East & Africa Heat Exchanger Tube Expansion Machine Sales Quantity by Country (2021-2032)

11.3.2 Middle East & Africa Heat Exchanger Tube Expansion Machine Consumption Value by Country (2021-2032)

11.3.3 Turkey Market Size and Forecast (2021-2032)

11.3.4 Egypt Market Size and Forecast (2021-2032)

11.3.5 Saudi Arabia Market Size and Forecast (2021-2032)

11.3.6 South Africa Market Size and Forecast (2021-2032)

12 MARKET DYNAMICS

12.1 Heat Exchanger Tube Expansion Machine Market Drivers

12.2 Heat Exchanger Tube Expansion Machine Market Restraints

12.3 Heat Exchanger Tube Expansion Machine Trends Analysis

12.4 Porters Five Forces Analysis

12.4.1 Threat of New Entrants

12.4.2 Bargaining Power of Suppliers

12.4.3 Bargaining Power of Buyers

12.4.4 Threat of Substitutes

12.4.5 Competitive Rivalry

13 RAW MATERIAL AND INDUSTRY CHAIN

13.1 Raw Material of Heat Exchanger Tube Expansion Machine and Key Manufacturers

13.2 Manufacturing Costs Percentage of Heat Exchanger Tube Expansion Machine

13.3 Heat Exchanger Tube Expansion Machine Production Process

13.4 Industry Value Chain Analysis

14 SHIPMENTS BY DISTRIBUTION CHANNEL

14.1 Sales Channel

14.1.1 Direct to End-User

14.1.2 Distributors

14.2 Heat Exchanger Tube Expansion Machine Typical Distributors

14.3 Heat Exchanger Tube Expansion Machine Typical Customers

15 RESEARCH FINDINGS AND CONCLUSION

16 APPENDIX

16.1 Methodology

16.2 Research Process and Data Source

16.3 Disclaimer

I would like to order

Product name: Global Heat Exchanger Tube Expansion Machine Market 2026 by Manufacturers, Regions, Type and Application, Forecast to 2032

Product link: <https://marketpublishers.com/r/GC4891C2FD48EN.html>

Price: US\$ 3,480.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:

info@marketpublishers.com

Payment

To pay by Credit Card (Visa, MasterCard, American Express, PayPal), please, click button on product page <https://marketpublishers.com/r/GC4891C2FD48EN.html>
