Abstracts

Heat Exchanger Tube Sheets are key components in the heat exchanger. They are mainly located at both ends of the shell part of the heat exchanger. They are used to fix and support the tubes inside the heat exchanger, and also prevent the two different types of heat exchangers on the shell side and tube side. Fluids mix with each other. There will be holes in the tube plate, and the tubes inside the heat exchanger pass through these holes, and then welding, expansion joints or other sealing methods are used to firmly fix the tubes to the tube plate.
