Abstracts

According to our (Global Info Research) latest study, the global Heat Gun Rental market size was valued at US\$ 67.09 million in 2025 and is forecast to a readjusted size of US\$ 82.39 million by 2032 with a CAGR of 2.6% during review period.

In 2025, global Heat Gun Rental reached approximately 6.5 million units, with an average global rental price of around US\$ 10 per unit. Heat Gun Rental refers to a service that allows customers to temporarily rent a heat gun, a handheld electric or fuel-powered tool that produces controlled hot air, instead of purchasing it outright. Heat gun rental is commonly used for short-term or occasional tasks such as paint and coating removal, plastic bending and forming, heat-shrink tubing application, vinyl wrapping, thawing frozen pipes, loosening adhesives, and surface preparation. The typical gross margin ranges from about 50% to 75%. The Heat Gun Rental market is a niche but steadily growing segment within the broader power tool and equipment rental industry, driven by demand for short-term, task-specific heating applications across construction, renovation, industrial maintenance, and DIY activities. Heat gun rentals are widely used for paint and coating removal, plastic forming, heat-shrink installation, adhesive softening, pipe thawing, and surface preparation, making them attractive for users who require the tool only occasionally or for a single project. The market benefits from low equipment cost, high durability, fast payback cycles, and high rental turnover, resulting in relatively strong profitability for rental providers. Growth is supported by increasing renovation activity, infrastructure maintenance, and cost-conscious behavior among contractors and homeowners who prefer renting over purchasing. Rental demand is primarily concentrated in local tool rental shops, hardware store rental counters, and regional equipment rental companies, with standard electric heat guns accounting for the majority of rentals, while industrial and propane-powered models serve specialized applications. Overall, the Heat Gun Rental market is characterized by stable demand,

high margins, and low operational complexity, making it an attractive supplementary category for rental operators. The Heat Gun Rental industry chain consists of upstream manufacturing and distribution, midstream rental operations, and downstream end users. Upstream players include heat gun manufacturers and component suppliers, providing electric and fuel-powered heat guns, heating elements, motors, housings, and temperature control components, typically sold through tool distributors or directly to rental companies. The midstream segment is composed of tool rental companies, equipment rental chains, and hardware stores with rental services, which purchase heat guns in bulk, manage inspection and maintenance, set rental pricing, and handle short-term and long-term rentals. Downstream demand comes from construction contractors, renovation companies, industrial maintenance teams, facility managers, and DIY users, who rent heat guns for temporary tasks such as paint removal, heat shrinking, plastic forming, adhesive softening, and pipe thawing. Overall, the Heat Gun Rental industry chain is relatively short and efficient, characterized by low equipment procurement costs, minimal maintenance requirements, high utilization rates, and fast capital recovery, supporting stable profitability for rental operators. The supply–demand dynamics and business opportunity of the Heat Gun Rental market reflect a stable and cost-driven niche within the power tool rental industry. On the supply side, rental providers benefit from low equipment procurement costs, wide product availability, and long service life, enabling easy inventory expansion with limited capital investment. On the demand side, contractors, maintenance teams, and DIY users typically require heat guns for short-duration, task-specific applications such as paint stripping, heat-shrink installation, plastic forming, adhesive removal, and pipe thawing, making rental a more economical option than ownership. Demand is further supported by ongoing building renovation, infrastructure maintenance, and the growing preference for flexible, on-demand tool access. From a business opportunity perspective, Heat Gun Rental offers high utilization potential, fast payback periods, and attractive gross margins, while also serving as a complementary rental product that drives foot traffic and cross-rental of other tools. As a result, the market presents steady revenue opportunities with low operational complexity, particularly for local and regional rental operators expanding their light-equipment portfolios.

This report is a detailed and comprehensive analysis for global Heat Gun Rental market. Both quantitative and qualitative analyses are presented by company, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

Key Features:

Global Heat Gun Rental market size and forecasts, in consumption value (\$ Million), 2021-2032

Global Heat Gun Rental market size and forecasts by region and country, in consumption value (\$ Million), 2021-2032

Global Heat Gun Rental market size and forecasts, by Type and by Application, in consumption value (\$ Million), 2021-2032

Global Heat Gun Rental market shares of main players, in revenue (\$ Million), 2021-2026

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for Heat Gun Rental

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global Heat Gun Rental market based on the following parameters - company overview, revenue, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Sunbelt Rentals, United Rentals, The Home Depot, Art's Rental, Smiths Hire, Arapahoe Rental, Colonial Rental, Johnson Creek Rentals, EquipmentShare, A Tool Shed, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Market segmentation

Heat Gun Rental market is split by Type and by Application. For the period 2021-2032, the growth among segments provides accurate calculations and forecasts for Consumption Value by Type and by Application. This analysis can help you expand your business by targeting qualified niche markets.

The content of the study subjects, includes a total of 13 chapters:

Chapter 1, to describe Heat Gun Rental product scope, market overview, market estimation caveats and base year.

Chapter 2, to profile the top players of Heat Gun Rental, with revenue, gross margin, and global market share of Heat Gun Rental from 2021 to 2026.

Chapter 3, the Heat Gun Rental competitive situation, revenue, and global market share

of top players are analyzed emphatically by landscape contrast.

Chapter 4 and 5, to segment the market size by Type and by Application, with consumption value and growth rate by Type, by Application, from 2021 to 2032.

Chapter 6, 7, 8, 9, and 10, to break the market size data at the country level, with revenue and market share for key countries in the world, from 2021 to 2026. and Heat Gun Rental market forecast, by regions, by Type and by Application, with consumption value, from 2027 to 2032.

Chapter 11, market dynamics, drivers, restraints, trends, Porters Five Forces analysis.

Chapter 12, the key raw materials and key suppliers, and industry chain of Heat Gun Rental.

Chapter 13, to describe Heat Gun Rental research findings and conclusion.
