Abstracts

Heat Interface Units are installed in multi-family apartments and act as a bridge between the housing unit and the central heating system. They eliminate the need to install heating systems in individual dwellings, and thus save costs.

Scope of the Report:

This report focuses on the Heat Interface Units in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes The market based on manufacturers, regions, type and application. Reduced investment and maintenance cost is one of the major factors driving The global heat interface units market. Installing gas boilers in individual dwellings in a multi-dwelling apartment complex includes various costs. Moreover, during installation, the gas lines are required to be calibrated for the right BTU levels. To prevent any compromise with the integrity of the pipe and the possibility of explosions, it is important to ensure that all the procedures are carried out properly, which requires trained professionals that add to the costs. Installing a central boiler plant eliminates the need for connecting individual dwellings to gas lines, resulting in significant cost savings. HIUs only require a centralized boiler and hot water risers. Therefore, there is no need for a piping network running through the buildings; this results in reduced costs and brings down the future costs for repair and maintenance. EMEA accounted for the maximum shares of The market during 2017. Our analysts have predicted that EMEA will witness steady growth in the next five years. HIUs are very popular in Europe, due to which they are the key leaders in the central heating systems market. Moreover, the extreme climatic conditions in Europe makes it a huge market for heating and cooling systems.

The worldwide market for Heat Interface Units is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
